mk LibLocker

24/7 access to hold items

mk LibLocker

## 24/7 access to hold items

mk LibLocker Features & Benefits

The mk LibLocker is allowing patrons to have access to various materials such as hold items at any time without staff intervention. Patrons can conveniently pick-up available material (like books, CDs, DVDs, magazines, and games), check items out, return items, access account information, renewal, and even place new holds.

The modular system allows the library flexibility in the future and the system can be expanded in capacity at any time.

The LibLocker is set up as a separate branch or location within your library system, making it customizable per library, their demands and needs. Modify the self-maintaining GUI design, receipts, accept returns from other branches, provide an additional pick-up location for hold items, and more. Easily done via mk LibManager, the centralized management and dashboard tool for all mk products. The system can be configured from a simple touchless Scan | Pick-up | Go process up to enhanced features usable via a touchscreen interface.

Both the indoor and outdoor models offer an option to add an Uninterrupted Power Supply (UPS) to protect against voltage swings or interruptions. The outdoor model features a heating system including temperature control. A canopy with integrated LED-lights, illuminated compartments and an optional 180° camera solution keep the system clean and safe.

Return Option	Modular & Expandable	Various Sizes
