mk Security Gates

RFID Security for Libraries

Benefits for your library:

- Sets off alarm with activated items only on outgoing patrons and not on ingoing patrons

- No false alarm on articles from other libraries or stores.

- Excellent 3D read rates

- Width between gates provides maximum space for wheelchairs and strollers.

- No extra handling required by self check. EAS or AFI switched automatically when material is checked in or out.

- Security functions via EAS Bit (Electronic Article Surveillance) or via the ISO 15693/18000 AFI sector (Application Field Identifier).

- Security function via EAS or AFI: activation of light and auditory alarms as soon as the security gates detect materials which are not signed out by ILS. Antennas are available in several designs.

- Integrated red alarm light and audible signal

Technical Details:

- Dimensions RFID Crystal antenna: 67.50" x 27" x 2.75".

- Weight: approx. 61.73 lbs

- Power Supply 120/230V 1P 60/50Hz

- Maximum width between gates is 1200 mm

- CE / UL certified

Optional:

- Gatetracker with two modules:
    - Reporting incoming and outgoing visitors
    - Item identification

- Base Plate installations Kit
    - Easy installation where drilling of holes is impossible
    - Carpet covers base plate
