

SelfCheck SC9

Flexible, economical option for patron self-service

SelfCheck SC9

Flexible, economical option for patron self-service

SelfCheck SC9 Features & Benefits

This SelfCheck model is a cost-efficient self-check option for any size library. The SC9 includes a 22" touch screen monitor, a shielded RFID antenna with integrated reader/writer, barcode scanner, receipt printer, and LibSoft software. The attractive designed tempered glass counter ensures to fit into any library's interior.

Patrons can check out or access their account by scanning their library card, smartphone, or entering their patron number with PIN number (if applicable). Items to be checked out, renewed, or returned are placed on the RFID antenna in a stack or read by the barcode scanner. If the library enables the Account View, patrons are able to view item due dates, renew items, and pay fines and fees via mk's LibSoft software.

The library has options to enable or disable SelfCheck features including, but not limited to printing a receipt, receiving an emailed receipt, or declining a receipt during the checkout, check-in, and renewal process. Optional items include card/cash payment, braille, audio, library calendar, OverDrive, and Novelist integration.
